ChemGrout’s CG-460 High-Pressure Colloidal Series is designed for the grouting of hollow bars, tiebacks and ground anchors.

Dual 70 gallon colloidal mix tanks for independent mixing of flushing and structural grouts.

Features a 2X8 high-pressure plunger pump, delivering 15 gpm and 2000 psi. Optional 3X8 pump, delivers 20 gpm, 1000 psi.

Heavy-duty frame and lifting lugs stand up to the most rugged jobsite conditions.

Power options include air, hydraulic, electric/hydraulic, and diesel/hydraulic.

ChemGrout’s variable speed, high shear disk rotates up to 3000 rpm, providing superior mix consistency.
CG-460 High-Pressure Colloidal Series

The versatile ChemGrout model CG460/2X8 is a skid mounted, high-pressure grout plant that is designed to mix and pump neat cements at high-pressures. The CG460 features two high shear colloidal 70-gallon (265 liters) mixing tanks, and a double acting, high-pressure plunger type grout pump. Dual 70 gallon colloidal mix tanks allow for independent mixing of flushing and structural grouts. Each mixer is equipped with variable speed, high-efficiency, high shear disks, rotating at speeds up to 3,000 rpm that provides rapid and thorough mixing. The tank outlet valves are a large 4" butterfly type that assures full material flow into pump suction. The grout pump is a double acting, positive displacement plunger style that will deliver 15 GPM (57 l/m), 2000 PSI (138 BAR).

The CG460 Series is available in a variety of power options models include air, hydraulic, electric/hydraulic (25 HP electric motor), and diesel/hydraulic (33 HP Kubota Engine). Both electric and diesel model require a separate skid mounted power pack. The rugged steel frame stands up to the toughest conditions on the job site. Operator controls are centrally located for efficient production. All components are easily accessible for operating, cleaning and maintenance.

Accessories

High-Pressure Grout Hose
Equipped with hammer union fittings.
Available in 25 and 50 foot lengths.

Water Meters
Available in manual or automatic.
Accurately measures the water for each batch.

In-Line Protected Pressure Gauge

Ball Seat Remover/Installer
Easily aligns double tapered steel ball seats on HP plunger pumps.

Applications include:
Hollow Bars, Grouted Anchors, Tiebacks, Post Grouting, Shaft Sealing, Water Cutoffs and Hydro Electric Dam Grouting.
